## ABOUT THE COMPANY

# One origin partner, *two ways to buy.*

Vaagai Vriksham Ventures operates across the food value chain at origin — sourcing agricultural commodities from Indian farms and converting native produce into branded, retail-ready food under **Farmigo**. Buyers source from us at any point on that chain: container-load commodities, or shelf-ready branded SKUs. We are **currently exporting to Qatar** and are extending the same range into **Malaysia** and the **UAE**.

### ■ An operating exporter

Not a first-time shipper — we ship to Qatar today. Bill-of-lading copy and trade reference available on request.

### ■ Origin-integrated supply

We source the farm produce and manufacture the Farmigo brand ourselves — supply security and private-label capability from our own raw material.

### ■ Single source, two categories

Bulk staples and a branded retail range from one supplier — fewer vendors, consolidated shipments, simpler documentation.

### ■ Multilingual labelling, built-in

English · Tamil · Malay · Chinese for Malaysia; Arabic for the Qatar / GCC market — designed in, not retrofitted.

## EXPORT & STATUTORY REGISTRATIONS
